International Black Sea University

One year of study; degree not completed.

2025 – 2026

Front-End Web Programming

IT Step Academy

CERTIFICATIONS

[View certificates ↗](#)

01 / PROFILE

Front-end developer building interactive web applications with JavaScript, Angular, and React. My experience comes from self-directed learning, coursework, and personal projects, with a focus on responsive interfaces, animation, and practical application development.

I'm seeking an opportunity to contribute to a collaborative team, strengthen my development skills, and help turn ideas into thoughtful, usable web experiences.

02 / EXPERIENCE

Ad Experience Developer — Codevelop.io

Jul 1, 2026 – Present

Building performance-first, visually engaging advertising experiences with polished motion, strong visual quality, and reliable delivery.

- Develop interactive ad experiences with HTML, CSS, and JavaScript.
- Optimize visual assets, including videos and images, to support fast, high-quality delivery.
- Balance animation, responsive behavior, visual quality, and performance across projects.

HTML · CSS · JavaScript

03 / SELECTED WORK

P / 01

Aug 10, 2026

Motion Shelf — Visual CSS Animation Library

A visual library for creating and previewing CSS animations. Organize reusable animations, copy their code, and export them for use in other projects.
